Subject: Dimock - Review of Residential Well Data

I apologize if you received a similar e-mail earlier - I am having some issues with lotus notes today and am not certain whether my earlier e-mail was sent/received.

As you know, EPA anticipates releasing all remaining data shortly. As such, I am following up regarding your review of the following:

- Round 2 metals results for the 4 wells re-sampled in May
- Re-analysis of lithium results for 57 wells sampled in Jan/Feb
- Rad sample results for the 61 wells sampled from Jan - March

We are working to address Terry's concerns regarding the Rad data - which we discussed during a call on Monday. In addition, we are working out final format issues for all the data reports referenced above. However, I wanted to touch base to see if you have any additional technical comments on any of the above data. If so, we would appreciate all comments by COB tomorrow - July 12th.

Please note that the Region is working to complete the QA review of 3 wells sampled in May as part of Supplemental Round 1. We are also working to complete the analyses/review of the recent re-sampling of HW-8a and HW-8b. We expect to provide this data to you for your review next week.

Please contact me with any additional comments and/or questions you may have regarding this matter.

Thanks for your help - Kelley
